HealthIT+™ successfully completes the Electronic Submission of Medical Documentation (esMD) Health Information Handler Connectivity Test

Columbia, MD — The Centers for Medicare & Medicaid Services (CMS) announced that QSSI successfully completed the Electronic Submission of Medical Documentation (esMD) Health Information Handler (HIH) connectivity test. Since August 2010, QSSI has been building a healthcare solution for the transmission of Electronic Medical Records (EMRs) and Personally Identifiable Information (PII) securely over the National Health Information Network (NHIN). NHIN provides a secure, nationwide, interoperable health information infrastructure that will connect providers, consumers, and others involved in supporting health and healthcare.

This is the first phase of testing for HealthIT+™ becoming an esMD HIH. The three phases are connectivity, functionality, and end-to-end testing. HealthIT+™ has passed connectivity testing and will proceed with functionality testing. Once passed, we will get another acknowledgement from the team and will move on to the final phase of testing (end-to-end). After end-to-end, we will be ready to fully implement esMD.

About HealthIT+™

HealthIT+™, a business division of QSSI, has been selected as one of seven companies to participate in a gateway pilot program to give providers a new secure and efficient mechanism for submitting medical documentation.

A Health Information Handler (HIH) is any company that handles health information on behalf of a provider. Examples include: Health Information Exchange (HIE); Regional Health Information Organization (RHIO); Release of Information (ROI) Vendor; Electronic Health Record (EHR) Vendor; and Claims Clearinghouse.

About QSSI

Founded in 1997, QSSI is an established CMMI® Level 3 organization with a proven track record delivering a broad range of solutions with particular expertise in Security & Privacy, Software Engineering, and Health IT. We are GSA approved for SIN 132-62, HSPD-12 System Integration Services and maintain a Top Secret Facility Clearance. Bringing together more than 400 of the most talented personnel in the industry, QSSI collaborates with both the public sector and private sector to maximize performance and create sustainable value for our customers. Additional information about QSSI may be found at www.qssinc.com.
