QSSI Wins Additional Task Order to Support HHS Centers for Medicare & Medicaid Services Integrated Data Repository

Columbia, MD — Maryland based QSSI was recently awarded a task order under the Integrated Data Repository (IDR) contract from the Department of Health & Human Services (HHS), Centers for Medicare & Medicaid Services (CMS). IDR provides data quality services to improve the accuracy of Medicare payment data. QSSI will develop the strategy to retire the National Claims History (NCH) file.

This task order is an integral part of the CMS data warehouse strategy. The IDR ensures a consistent, reliable, secure, enterprise-wide view of the data supporting CMS and its partners in more efficient delivery of quality health care at a lower cost to CMS' beneficiaries through state-of-the-art health informatics.

The IDR database provides CMS with critical Medicare claims, provider and plan data, as well as data services that will be used by the National Level Repository (NLR). CMS will utilize the NLR data to make the Medicare incentive payment determinations for eligible health care professionals and hospitals under the Electronic Health Record (EHR) incentive programs.

About QSSI

Founded in 1997, QSSI is a rapidly growing firm with a broad set of Information Technology solution offerings. A SEI CMMI® Maturity Level 3 firm, QSSI focuses on enterprise software development, security and privacy services, and critical IT infrastructure solutions as core competencies. QSSI has successfully performed on over 200 Federal civilian contracts and has over 400 IT professionals. Additional information about QSSI may be found at www.qssinc.com.
