QSSI to Deliver HSPD-12 ID Card Issuance System to the Administrative Office of the United States Courts

Columbia, MD — Maryland-based QSSI was recently awarded a prime contract by the Administrative Office of the United States Courts (AOUSC) to deliver an Homeland Security Presidential Directive 12 (HSPD-12) compliant ID card issuance system. QSSI will implement its *Verify+*TM Federal Information Processing Standards (FIPS) 201 identity management solution and provide other hardware, software, and support services needed to replace AOUSC's current ID card issuance system. Using a phased approach, the AOUSC expects to add HSPD-12 compliant smart card capabilities to its infrastructure. Once issued, the Personal Identity Verification (PIV) cards will be able to support physical and logical access control to various agency assets.

The AOUSC is the central support entity for the Judicial Branch of the U.S. Government. It provides a wide range of administrative, legal, financial, management, program, and information technology (IT) services to the Federal courts.

The AOUSC HSPD-12 compliant card issuance initiative is representative of the growing trend amongst Government agencies to start handling such activities in-house allowing greater flexibility and control. QSSI's *Verify+*TM FIPS 201 compliant identity management solution is an ideal platform for such applications. *Verify+*TM uses GSA approved FIPS 201 components and enables agencies to build unified physical and logical access control strategies.

About QSSI

Founded in 1997, QSSI is a rapidly growing firm with a broad set of information technology solution offerings. A SEI CMMI® Maturity Level 3 firm, QSSI focuses on enterprise software development, security and privacy services, and critical IT infrastructure solutions as core competencies. QSSI has successfully performed on over 200 Federal civilian contracts and has over 400 IT professionals. Additional information about QSSI may be found at www.qssinc.com.
